Commingling for Australia Races

1   Commingling of pools is where one totalisator organisation combines its wagering pool with another to create one common dividend. With a bigger betting pool, racing fans can enjoy greater dividend stability and potentially higher dividends.

2   R.S.T.C.'s totalisator pools for Australia races are commingled into the pools hosted by Sky Racing World (SRW) (USA).

3   The totalisator pools are for the following bet-types:

      .1   WIN
      .2   PLACE (or US SHOW) – Select a horse to finish first, second or third position
      .3   EXACTA (TRUEFORECAST) – Select two horses to finish first <u>and</u> second position in the correct order
      .4   TRIFORECAST (TIERCE)
      .5   FOURFORECAST (QUARTET)

4   Per unit bet for WIN and PLACE is RM5.

5   Per unit bet for Exacta, Triforecast and Fourforecast is RM2.

6   Please refer to detailed information below

Australian Racing (thoroughbred/harness)

wagering menu & rules

Current pools offered:

Win (first place finisher(s)) US$1 minimum (RM5 per unit)

Place (first place and second place finisher(s) of race) US$1 minimum (RM5 per unit)

Show (first place, second place, and third place finisher(s) of race) US$1 minimum (RM2 per unit)

Exacta (first and second in exact order) US$1 minimum (RM2 per unit)

Double (two consecutive first place finishers in programmed races) US$1 minimum (RM2 per unit)

Trifecta (first, second, and third in exact order) US$0.20 minimum (RM2 per unit)

Superfecta (first, second, third, and fourth in exact order) US$0.20 minimum (RM2 per unit)

Current wagering rules after early scratchings*:

Win $\geq$ two runners

Exacta $\geq$ two runners

Double $\geq$ two runners

Place $\geq$ four runners

Trifecta $\geq$ four runners

Show $\geq$ six runners

Superfecta $\geq$ five runners

all figures are at close of betting/number of horses that actually start the race. In the case of five runners actually jumping and only three finishing (two FTF), the superfecta would pay to First-Second-Third-ALL.

With late scratchings after 'open,' pools are left in until the field drops under the amount of entries needed to complete the wager. For example, in a field of five with a late scratch down to four, the superfecta would stay in and pay to winners. If another horse comes out at the gate and only three start, the superfecta would then be refunded.

No carryovers in place for any exotic (Ex,DD,Tri,Super,PK3,PK4) pools offered. In the event of no winning tickets, entire pool after takeout goes to bettors with closest combination working backwards e.g. a trifecta with no winning combinations would pay to all bettors with the first two placegetters and then ALL in third, etc… 1-2-ALL, 1-ALL-ALL.
